

ENVIRONMENTAL POLICY

WE and ENVIRONMENT

We consider environmental protection as part of our corporate responsibility. Our environmental management is in our existing quality management system and is subject to a continuous improvement process.

We see the focuses of our active environmental management in

1. continuous improvement of our processes, products and systems
2. attention to environmental aspects already during processes development and facility planning
3. preventive maintenance
4. trainings in order to avoid accidents and malfunctions
5. continuous reduction of emissions by most suitable, economically justifiable technology
6. reducing the use of operating materials and energy
7. compliance with the existing legal framework
